Dear Dr. Achebe,

I am referring my patient, Aisha Brennan, for evaluation of new-onset atrial fibrillation detected on a 12-lead ECG on 06/30/2026. A 14-day ambulatory monitor (device SN-PM195325) showed a 22% AF burden with ventricular rates up to 138 bpm. CHA2DS2-VASc score is 3; apixaban 5 mg BID was started on 07/01/2026.

Relevant history includes hypertension, obstructive sleep apnea on CPAP, and a remote left knee replacement. The patient works as a high school chemistry teacher and prefers afternoon appointments. Please contact her directly at (555) 018-5304 or aisha.brennan@example.com.

Thank you for seeing this patient. Records are enclosed.
